FOR IMMEDIATE RELEASE

**DIGI-DATA CHOOSES KODAK SERVICE & SUPPORT AS PROVIDER**  
*Storage Product Line Enhanced with On-Site KODAK Service Offering*

**ROCHESTER, N.Y., Jan. 9, 2007** – KODAK Service & Support, Eastman Kodak Company's worldwide service organization, will serve as the sole on-site service provider for Digi-Data Corporation, a leading manufacturer of high performance storage systems and controllers.

One year of KODAK Service & Support will come with Digi-Data storage products. Coverage will include the T-2000 clustered storage system and the company's newest line of clustered RAID controllers, the T-3000 Controller family, launched during the third quarter of 2006.

"As we continue to expand our product line, Digi-Data wanted to also enhance the service capability that accompanies it," said Tom Fabrizio, Director of Channel Sales, Digi-Data. "The Kodak team supports a comprehensive portfolio of storage networking products, so we can leverage their expertise to help our customers get the most out of our systems for image storage, disk-to-disk backup, and archival usage."

Additionally, KODAK Service & Support will provide help desk services for Digi-Data customers across the United States and Canada. Fabrizio said the offering is a key competitive advantage, as there are usually "significant additional costs" associated with this higher level of service.

"We're happy to help Digi-Data extend the value it offers to its customers and channel partners beyond its growing line of storage products," said Tony Barbeau, Director, Imaging and Storage Global Services, KODAK Service & Support. "We look forward to expanding Digi-Data's geographic reach for support as they continue to widen their customer base."

KODAK Service & Support, named Best Support Organization at the 2006 International Business Awards, is made up of more than 3,000 professionals in 120 countries. It is a leading multi-vendor IT services provider, supporting more than 100 manufacturers of document scanners, storage devices and systems, and micrographic imaging equipment.

### **Eastman Kodak Company**

Kodak is the world's foremost imaging innovator, providing leading products and services to the photographic, graphic communications, and healthcare markets. With sales of US\$14.3 billion in 2005, the company is committed to a digitally oriented growth strategy focused on helping people better use meaningful images and information in their life and work. Consumers use Kodak's system of digital and traditional image capture products and services to take, print, and share their pictures anytime, anywhere; businesses effectively communicate with customers worldwide using Kodak's solutions for prepress, conventional, and digital printing and document imaging; creative professionals rely on Kodak's technology to uniquely tell their story through moving or still images; and leading healthcare organizations rely on Kodak's innovative products, services, and customized workflow solutions to help improve patient care and maximize efficiency and information sharing within and across their enterprises.
